Step 2 Behavioral Report

Introduction

This report was generated automatically from the Step 2 behavioral harmonization pipeline.

Behavioral Overview

Metric	Value
Participants included in Step 2 summaries	36
Trials included in Step 2 summaries	1075
Questions summarized	30
Globally excluded participants	2

Global Participant Exclusions

The following participant IDs were removed from all Step 2 analysis tables, counts, and plots after Step 3 review. Their files remain on disk for audit only, and future downstream steps should continue to honor this exclusion list.

Metric	Value
PID006	Global downstream exclusion after Step 3 review: Exc from Step 1 and Step 2 summaries and from future stream analyses after Step 3 documented session 20 12_002 as an implausibly short 10.420224 second rec with no paired PsychoPy log.
PID037	Global downstream exclusion after Step 3 review: Exc from Step 1 and Step 2 summaries and from future stream analyses because a behavioral log exists b fNIRS session folder was found in Step 3.

Abstract Versus Concrete

Metric	Value
Abstract mean accuracy	0.6252
Abstract mean RT	91.1214
Concrete mean accuracy	0.4963
Concrete mean RT	89.2287
